

TANISHQ KUMAR KASHYAP

Full Stack Developer & Cybersecurity Enthusiast

☎ +91-9919XXXXXX ✉ tanishqXXXX@gmail.com 🔗 linkedin.com/in/tanishq-kashyap 🌐 github.com/tanishqXXXX

Summary

Passionate **Full Stack Developer and Cybersecurity Enthusiast** with strong foundations in **MERN stack** (MongoDB, Express.js, React, Node.js), databases (SQL & NoSQL), and secure application development. Skilled at building modern, scalable, and responsive applications with emphasis on clean UI/UX, backend optimization, and data security. Experienced in designing dashboards, safety platforms, and AI-integrated web apps. Recognized nationally for contributions to cybersecurity through award-winning projects.

Skills

Frontend: React.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, REST APIs, Authentication, JWT

Databases: MongoDB, SQL (MySQL/PostgreSQL)

Cybersecurity: Kali Linux, Wireshark, Burp Suite, Nmap, Metasploit, Network Security

Other Tools: Git/GitHub, Firebase, Power BI, Docker (basic), Linux CLI

Core Abilities: Full Stack Development, Data Analysis, Secure Coding Practices, Problem-Solving, EDA, Team Collaboration

Projects

Task Manager Pro | *MERN Stack, EJS, MongoDB*

2025

- Built a professional-grade full-stack task management system with **dark/light mode, drag-and-drop task reordering, priority levels, categories, and due date reminders**.
- Integrated **EJS views, search filters, and advanced statistics dashboard** for productivity insights.
- Added secure user authentication, notifications, and PWA support for cross-device usability.

SafeAI – AI-Powered Safety Management Platform | *Node.js, MongoDB, Google Maps API, AI Models*

2025

- Developed a futuristic AI-driven platform that maps **risk-prone zones, tracks safe routes**, and generates safety ratings using real-time data.
- Integrated **Google Maps API with AI-based route optimization** and real-time geofencing alerts.
- Designed a neon-themed UI with auto-scrolling landing sections and **real-time AI incident detection**.

MetaHealthXR – AI Health Companion in Metaverse | *Python, Three.js, Firebase*

2025

- Built a hybrid **Python-based GUI with 3D metaverse interface** for health monitoring.
- Features include real-time vitals tracking, emergency alerts, and XR-driven immersive visualization.

Emergency Health Monitoring Web App | *HTML, CSS, JS, Google Maps API*

2025

- Developed a responsive web app that monitors vitals (**heart rate, BP, SpO2, stress**) and triggers emergency alerts.
- Integrated **location-based hospital suggestions and live navigation routes** in critical cases.

Awards & Certifications

- **Winner – Securing Networks and Devices (ISEA Project Phase III) — CDAC Noida (Aug 2025):** Secured the **First Prize (Winning Team)** in a national-level project event organized under the Information Security Education and Awareness (ISEA) Project Phase III. Recognized for outstanding innovation in **network and device security**, demonstrating practical cybersecurity skills including vulnerability assessment, secure configurations, and defense strategies. This award acknowledges significant technical expertise, teamwork, and problem-solving in real-world cybersecurity challenges.

Education

University School of Information and Communication Technology

Graduation: 2028

Guru Gobind Singh Indraprastha University, Delhi
